How to:

Install the DynaMed Plus App

1. Go to the library’s homepage and log in. (Either your mobile device or a PC will work for this step.)

2. Access DynaMed Plus from the link on this page.

4. Complete the form to receive an email with instructions.

   *If you don’t receive the email immediately, check your Spam or Junk folder for a message from donotreply@ebsco.com.

5. Follow the instructions in the email. Install the DynaMed Plus Android or Apple iOS app onto your mobile device.

   **Note:** The DynaMed Plus app downloads all content to your device. It requires more memory than other apps, but it is also fully functional **without wireless access**.

6. View the email on your device and use the **authentication key** to enter the app. Follow the installation instructions to set up your app.

7. **Search and access information through DynaMed Plus!**

   *Mobile information is subject to change. This information was current on 6/26/2017.
